PROFESSIONAL SUMMARY

Computer Science graduate with strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and software development principles. Experienced in building projects using Java, Python, MERN Stack with focus on backend development and problem-solving. Seeking to contribute to scalable systems and real-world software products in an SDE role.

EDUCATION

Bachelor of Technology – Computer Science and Engineering **August 2023 – May 2027**
SR University | Warangal,Telangana

- GPA:6.1/10 | Graduation: May 2027
- Relevant Coursework: Data Structure, Operating System, DBMS, Advance Data Analytics, Coumpter Networks,

PROJECTS

E-Commerce Web Application | *Full-Stack Academic Capstone Project*React, Node.js, PostgreSQL, REST API | **January 2024 – April 2024**

- Designed and developed a full-stack e-commerce platform with user authentication, product catalog, shopping cart, and order management using React and Node.js.
- Built RESTful API with Node.js and Express handling 15+ endpoints; integrated PostgreSQL database with normalized schema supporting 10,000+ product records.
- Implemented JWT-based authentication and role-based access control (RBAC) for admin and customer users, reducing unauthorized access to zero.
- Deployed application on AWS EC2 with Nginx reverse proxy; achieved 99 percent uptime during a 30-day academic evaluation period.

Student Course Scheduler | *Software Engineering Group Project*Java, Spring Boot, MySQL, React | **August 2023 – December 2023**

- Collaborated in a 4-member agile team to build a course scheduling web app serving 500+ simulated students; managed sprints using Jira and GitHub.
- Developed backend REST API with Java Spring Boot and MySQL, reducing schedule conflict detection time by 70 percent compared to manual methods.
- Wrote unit and integration tests achieving 85 percent code coverage using JUnit and Mockito; conducted peer code reviews for all pull requests.

Personal Finance Tracker | *Personal Side Project* Python, Flask, SQLite, Chart.js | **June 2023 – August 2023**

- Built a personal budgeting web app in Python (Flask) that categorizes expenses, generates monthly reports, and visualizes spending trends with Chart.js.
- Automated CSV bank-statement ingestion pipeline processing 500+ transactions per import with duplicate detection and data validation.
- Published on GitHub with full documentation; received 120+ stars from the open-source community within 3 months of release.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript
Frontend: React, HTML5, CSS3, Next.js,
Backend: Node.js, Express, Spring Boot, Flask, REST API
Databases: PostgreSQL, MySQL, SQLite, MongoDB
Cloud and DevOps: Amazon Web Services (AWS), Docker, GitHub Actions, CI/CD
AI & GenAI: LLM API Integration (OpenAI/Anthropic), Prompt Engineering, AI Workflow Automation
Tools: vs code, Jira, Figma

CERTIFICATIONS AND ACHIEVEMENTS

- Solved **100+ Data Structures and Algorithms problems** across on LeetCode and GeeksforGeeks, strengthening core problem-solving and coding interview skills.
- AWS Certified Cloud Practitioner 2024
